CAD Services
Support where you need it most

VALUE ADDED BENEFITS

Wouldn’t it be nice to have a CAD Service that can not only get your drawings to you, accurate and on-time, but also have access to a vast code library?

NTA’s CAD Services has that type of forward thinking. Our technicians work closely with our engineering and review departments - and that enables us to draw with intent to provide support right where you need it most.

Our CAD department can work with your current third-party agency, engineering team or drafting technician - or we can pull a team together for you at NTA. This means we have the ability to tackle any project - big or small!

CAD SERVICES

Some of the services we provide are:

- Residential modular approvals*
- Commercial modular approvals*
- RV approvals
- Park model approvals**
- Manufactured housing*
- Timber frame packages
- Post frame packages
- Design using SIPs
- Installation manuals
- Production drawings
- Structural details
- Individual components
  - Plumbing isometrics
  - Electrical prints
  - Foundation design
  - Blocking plans

*Not available for third-party in all states
**For approval states and Canada
CUSTOMIZED PLAN APPROVAL

As a manufacturer of Recreational Vehicles, you know that certain states (and Canada) require state review and approval of RV plans. This approval process and model tracking can be confusing because it involves time consuming paperwork that is unique to each jurisdiction.

EFFICIENT SUBMITTAL PROCESS

Do you have trouble keeping track of RV code changes? What about renewal dates, and all the required paperwork? NTA has an automated tracking system that notifies us when a plan is going to expire - in plenty of time for re-submission. This ensures no plan will get overlooked. This simplifies the submittal process for you, giving you more time to focus on your product!

MOST UP-TO-DATE CODES

As a member of the NFPA, NTA stays up-to-date on code changes, and since we know how each state works, we can create a submittal plan tailored specifically to your needs. We can also work with your current listing agency to provide submittal packages to Canada!

COMPLETE PLAN APPROVAL

NTA provides everything you need, and handles the paperwork! A complete, custom submittal package includes:

- Official cover page
- Plumbing plans
- Floor plans
- Electrical plans
- Gas line layouts
- 12v calculations
