NTA offers fire-testing services to the RV and manufactured housing industries to ensure their products are code compliant according to national and international standards. Materials that need this testing include: interior finishes, cabinets and countertops.

**Tests Performed**

- FMVSS 302: Flammability of Interior Materials - Passenger Cars, Multi-purpose Passenger Vehicles, Trucks and Buses

**Industries Served**

- Recreational Vehicle
- Manufactured Housing
- Transportation
- Coal Mine Safety and Health
- Building and Construction

NTA Performs testing to aid in determining the surface flammability and flammability of interior materials.
