

STRUCTURAL ENGINEERING

Quality Engineering Since 1976

Engineering Services

Our engineering department can provide you with calculation packages custom to your needs for residential or commercial modular manufactured housing or site-built construction. NTA's engineering staff includes several Professional Engineers who are licensed in all 50 states. In addition to our PE's, we have design engineers – so we are staffed to provide the best turn-around time in factory-built housing. We can also provide expert consulting to help assist clients with any code or construction issue, as well as expert witness services for construction related legal cases.

Expert Engineering

- ▶ Off-Site and Stick-Built Construction
- ▶ Roof systems (rafter or truss)
- ▶ High wind, snow or seismic zones
- ▶ Complete design manuals
- ▶ Structural Insulated Panels (SIPs)
- ▶ Timber frame design
- ▶ Pole barns
- ▶ Specialty engineering
- ▶ Expert Witness
