

RV

## Plan Approval Packages

### CUSTOMIZED PLAN APPROVAL

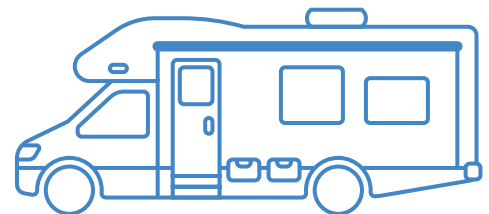

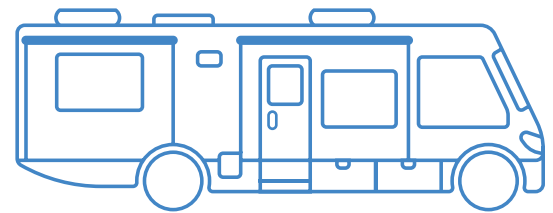

As a manufacturer of Recreational Vehicles, you know that certain states (and Canada) require state review and approval of RV plans. This approval process and model tracking can be confusing because it involves time-consuming paperwork that is unique to each jurisdiction.

### EFFICIENT SUBMITTAL PROCESS

Do you have trouble keeping track of RV code changes? What about renewal dates, and all the required paperwork? NTA has an automated tracking system that notifies us when a plan is going to expire - in plenty of time for re-submission. This ensures no plan will get overlooked. This simplifies the submittal process for you, giving you more time to focus on your product!

### MOST UP-TO-DATE CODES

As a member of the NFPA, ICC NTA stays up-to-date on code changes, and since we know how each state works, we can create a submittal plan explicitly tailored to your needs. We can also work with your current listing agency to provide submittal packages to Canada!

### COMPLETE PLAN APPROVAL

ICC NTA provides everything you need and handles the paperwork! A complete, custom submittal package includes:

- ▶ Gas line layouts
- ▶ 12v calculations
- ▶ Floor plans
- ▶ Electrical plans
- ▶ Official cover page
- ▶ Plumbing plans
