

ICC NTA, a member of the International Code Council (ICC) Family of Solutions, is a company of objective professional engineers, plan reviewers, technicians, consultants, and design draftsmen. We are an independent third-party agency accredited to ISO 17025, ISO 17020, ISO 17065, and Standards Council of Canada (SCC) standards for testing, inspection, and certification services. These accreditations ensure that consumers and regulatory agencies can be confident in our services.

ICC NTA Benefits

Innovation

To fulfill our goal of safe, affordable, efficient buildings for everyone, we believe innovation in technology, tools, and service are key. Our clients are innovators in their fields, and we support them through innovation, as well. To effectively support innovative manufacturers, we continue to research and adopt cutting-edge technologies to augment our services.

Collaboration

We work together with our clients to solve their challenges and address their needs. With you involved every step of the way, you are better equipped to meet market demands. Working together with our team of experts will aid you in getting to market with fast and reliable results.

Confidence and Trust

With nationally recognized accreditation, state-of-the-art equipment and processes, and our reputation for integrity, your customers will trust our results. As a member of the ICC family of solutions, our experts understand local building codes and standards and can guide you the process with ease.

OFF-SITE CONSTRUCTION

Plan Review, Engineering, and Inspection Services

With extensive knowledge in modular and off-site construction, ICC NTA is a leader in third-party plan review, engineering, and inspection services for prefabricated structures and structural assemblies. Our large global network of third-party inspectors enables us to assess in-plant quality control procedures to ensure the consistent quality of your product for code compliance.

HUD SERVICES

DAPIA & IPIA Services and Installation Inspections

ICC NTA is one of only five private companies approved by the Federal government to complete design approval and perform quality audits as a HUD-approved DAPIA and IPIA services provider for manufactured housing. Our staff uses state-of-the-art tools, like our custom-developed Online System, to complete your design and manual reviews effectively and efficiently. The result: less time waiting and more time building affordable, safe housing for your customers.

PLAN REVIEW

Flexible, Quick, and Experienced

Third-party plan review by ICC NTA helps to ensure off-site construction projects will meet or exceed requirements for quality, safety, performance, and code compliance. Our staff includes expert plan reviewers with certifications in all disciplines and professional engineers who are registered in all 50 states.

ENGINEERING AND DESIGN

ICC NTA's staff of engineers and CAD Technicians provide a full suite of technical services. We have the technical expertise to give you precisely what you need when you need it, from complete structural engineering calculations and analysis to aid in determining code compliance.

TECHNICAL EXPERTISE

ICC NTA collaborates with Standards Development Organizations (SDO) and frequently participates in committees to develop new standards and codes. Members of ICC NTA's staff provide input to the MHCC (Manufactured Housing Consensus Committee), ICC's BCIC (Building Code Interpretation Committee), the IAS Technical Advisory Council, and participate in SDO activities with ASTM International and others. ICC NTA partners with industry associations to create and implement industry-wide certification programs to develop product consistency in quality and compliance.
