# ICC Third-Party Plan Review Services for Data Centers

## Confidence for High-Capacity, High-Reliability Facilities

Trusted by jurisdictions, designers, and developers nationwide, ICC Plan Review provides expert, scalable, and defensible plan review services to help data center projects stay compliant, on schedule, and aligned with operational goals.

### About Us

As part of the International Code Council, the organization behind the I-Codes®, ICC Plan Review delivers fast, reliable, and expert plan review services with a focus on clarity, responsiveness, and supporting you to ensure the best outcomes for every project.

- Unmatched expertise across disciplines
- Hundreds of design professionals & developers served across sectors
- 150+ AHJs served nationwide
- Serving all 50 U.S. states & territories

### Our Services

- Full plan review for building, fire, MEP, accessibility, and life safety systems
- Independent, third-party electrical field evaluations and special inspections
- Aligned with recognized standards such as NFPA 790/791 and SPE-1000
- Energy system compliance
- Modular/off-site construction plan review
- Preliminary (early-phase) review and phased submittal support
- Shop drawing, revision, and permit closeout reviews
- Remote inspections

# ICC Third-Party Plan Review Services for Data Centers

## The ICC Plan Review Difference for Data Centers

Data centers demand more than routine plan review to ensure safety, performance, and reliability. With high energy and water demands, critical uptime requirements, and complex systems integration, these facilities require reviewers who understand how technical standards apply in real-world contexts.

ICC Plan Review goes beyond standard reviews by providing:

**Deep Code Expertise:** our unique position as the organization that publishes the I-Codes ensures you have access to unmatched code expertise and the most current code information available, giving you the perfect partner as the data center industry evolves.

**Integrated Coordination:** alignment across AHJs, developers, and design teams to keep complex scopes moving smoothly and compliantly.

**Energy & Mechanical Insight:** review of cooling systems, thermal management strategies, and mechanical designs for compliance.

**Phased Project Readiness:** with workflows built for speed and consistency, reducing delays and re-reviews across fast-moving phases.

**Clarity across Disciplines:** concise, code-cited review comments that streamline response and resolution.

**Scalable Capacity:** we help you meet high-volume project demand as needed, allowing you to meet construction surges and temporary staffing gaps.
